

Part One

Board Policy ADF is amended as follows:

Physical Activity and Education

The district will provide physical education opportunities for physical activity aligned with the Missouri Learning Standards and GLEs in health and physical education in all grades. The wellness program coordinators, in consultation with the wellness committee, will develop procedures that address physical education and physical activity.

The district shall prohibit the use of physical activity as a form of discipline or punishment and ensure that physical education and recess will not be withheld as punishment, unless the discipline or punishment is a direct result of an incident or behavior that happens during physical education or recess.
